# SECUREDOCS
SENTRY

Simple. Powerful.
Document Security.

TROY

Tamper-Resistant Document Solution.

TROY SecureDocs Sentry delivers a total protective solution to prevent forgery, falsification, and alteration of your sensitive documents. Increase trust in your printed documents, no matter who they're meant for, whether vendors, customers, or enforcement officials.

Original Document without Security

Start with a Word, Excel, or PDF document containing all necessary data

SecureDocs Sentry Template

The secure template is automatically called to identify the data and add security

New Document with Layered Security

This final output can be generated as a PDF or sent directly to the printer

SECUREDOCS SENTRY

Easily Add Layered Security to any Document.

Examples of High Value Documents at Risk for Fraud:

- ✓ Identity Documents
- ✓ Breeder Documents
- ✓ Financial Statements
- ✓ Licenses & Registrations
- ✓ Invoices & Receipts
- ✓ Transcripts & Diplomas
- ✓ Clearance Reports
- ✓ Credit Statements
- ✓ Insurance Claims
- ✓ Mortgage Statements

ORIGINAL INVOICE

SECURED INVOICE

Advanced Security Features Help Prevent Fraud.

Secure documents need multiple layers of security elements. SecureDocs Sentry enables easy template creation that automatically applies industry leading security to your most sensitive documents.

🔒 **Warning - This Document contains the following Anti-Fraud Security Features:**
- Image Watermark: This document contains a watermark.
- TROYmark™: Diagonal watermark containing static message or document data to prevent alteration.
- SecureMark: Encrypted QR code for digital authentication and verification of document data.
- MicroPrint: Small text can be read under magnification. Will distort on copy.
- MicroPrintBorder: Border with small text that can be read under magnification. Will distort on copy.
- Security Background: Light gray background with repeating image. Absence indicates alteration.

TROY UV Printers

As an HP Partner, we are the only manufacturer authorized to enhance HP printers - the world's most secure printers - for document security. Including printer and tray locks, along with embedded endpoint protection and security inks & toners, TROY Printers give organizations the ability to add layered security to high value printed documents at risk for fraud.

UV VERIFICATION

TROY Security Inks & Toners

Patented Security Inks and Toners add a hidden layer of security to your high value documents. Make authentication easy and counterfeiting difficult by adding overt and covert layers of security that fluoresces blue with the correct UV verification light.

Combining Hardware, Software and Security Inks & Toners Creates an End-to-End Document Security Solution.

SecureDocs Sentry utilizes TROY UV Printers and Security Inks & Toners developed by TROY to create a complete fraud-resistant solution to secure any document.
